Precision Core™

MDO Concrete Form

Precision Core™ MDO Concrete Form Consistent to the Core

Precision Core MDO Concrete Form features the finest quality overlay paper, providing for a better surface from edge to edge.

A Nox-Crete release agent means no panel adhesion after concrete has set, allowing for repeated uses of the panel.

The Precision Core panel engineering ensures consistency across the panel – without gaps and voids.

Potlatch Precision Core™ MDO Concrete Form is engineered specifically for the unique requirements of concrete forming. Starting with the core of the panel, an advanced core composer technology ensures a consistent panel from end-to-end, virtually eliminating core gaps and voids. High resin content paper allows the panel to resist surface abrasion and edge splitting and slivering – even in high alkalinity environments found in concrete work. Single-step panel production means you get superior panel consistency and better performance.

Panel Specifications:

- Single step production
- Group 1, Struc 1 species (except where specified)
- Nox-Crete release agent
- Premium edge seal

Panels Available:

Thickness	Ply
15/32" and 1/2"	5 ply
19/32"	5 ply
5/8"	5 and 7 ply
23/32"	5, 6 and 7 ply
3/4"	7 ply

all potlatch plywood is available
with FSC certification
